APPLICATION TEST LOG

Course: SWE 3409 — Mobile Application Development

Assessment: Individual Assignment 2

Student and Build Information

- **Student:** MANZI PRINCE Peter
- **Registration number:** 25/28149
- **Application:** CMPortfolio
- **Verification code:** MOB-A2-8149
- **Expo SDK:** To be recorded
- **Application version:** 1.0.0 (planned release version; verify against app configuration)
- **Android device model:** To be recorded
- **Android version:** To be recorded
- **APK build ID or build URL:** To be recorded
- **Test date:** To be recorded

1. Test Results

Use these result labels:

- **PASS:** The test was performed and the expected result occurred.
- **FAIL:** The test was performed and the expected result did not occur.
- **NOT TESTED:** The test has not yet been performed.
- **BLOCKED:** Testing could not proceed because of an identified issue.

ID	Test	Expected result	Result
T01	Launch installed APK	App opens without Expo Go	NOT TESTED
T02	Home identity	Exact identity sentence is displayed	NOT TESTED
T03	About screen	Student details and MOB-A2-8249 are correct	NOT TESTED
T04	Bottom-tab navigation	All intended sections open correctly	NOT TESTED
T05	Project details	Selected project displays correct details	NOT TESTED
T06	Android Back navigation	Returns to the previous screen correctly	NOT TESTED
T07	Invalid headline	Field-level error appears and saving is blocked	NOT TESTED
T08	Invalid biography	Field-level error appears and saving is blocked	NOT TESTED
T09	Invalid primary skill	Field-level error appears and saving is blocked	NOT TESTED
T10	Valid profile update	Changes save and confirmation is displayed	NOT TESTED
T11	Profile persistence	Saved profile remains after app restart	NOT TESTED
T12	Gallery selection	Selected image is previewed	NOT TESTED

ID	Test	Expected result	Result
T13	Camera capture	Captured image is previewed	NOT TESTED
T14	Media cancellation	Existing profile image remains unchanged	NOT TESTED
T15	Media permission denial	Clear feedback is shown without a crash	NOT TESTED
T16	Replace profile image	New image replaces the existing image	NOT TESTED
T17	Remove profile image	Image is removed and empty state appears	NOT TESTED
T18	Image persistence	Selected image remains available after restart	NOT TESTED
T19	Airplane Mode	Core portfolio features remain usable offline	NOT TESTED
T20	Increased system text	Screens remain readable without clipped controls	NOT TESTED
T21	Reset profile	Profile resets to the documented initial state	NOT TESTED

2. Defect and Resolution Record

Test ID	Observed problem	Action taken	Retest result
To be completed	To be completed	To be completed	NOT TESTED

Record real errors and their actual fixes. If no defects are found, state that only after the tests have been completed.

3. Release Verification

Before release, verify the following:

- ☐ EAS Android build completes successfully.
- ☐ The resulting APK is downloaded and opens on an Android device.
- ☐ The app runs without Expo Go.
- ☐ The configured Android package identifier is unique.
- ☐ The identity and verification code are correct.
- ☐ Profile data and image persistence are verified after restart.
- ☐ Core features work in Airplane Mode.
- ☐ Final release artifact and documentation filenames are correct.

4. Final Test Summary

Total tests defined: 21

Passed: To be completed after testing.

Failed: To be completed after testing.

Not tested: To be completed after testing.

Blocked: To be completed after testing.

Outstanding defects: To be completed after testing.

Overall release decision: NOT YET VERIFIED

5. Evidence References

Record the paths to actual supporting evidence, such as device screenshots, a test video, EAS build information and the final APK.

- Installed APK evidence: To be added
- Persistence evidence: To be added
- Airplane Mode evidence: To be added
- Validation evidence: To be added
- EAS build evidence: To be added
